Wedding Bells

LARSON-JOHNSON

Trinity Lutheran church, north of Lougheed, was the setting for a very pretty ceremony on Sunday afternoon at three o'clock, when Erna E. Johnson, eldest daughter of Mr. and Mrs. Eric Johnson of Lougheed, became the bride of Olaf P. Larson, son of Mr. and Mrs. M. Larson of Irma.

Rev. Mr. Stiles, of Viking, performed the marriage service.

White sheer silk fashioned the too-length dress the bride chose for her wedding. Made on youthfully simple lines the dress was worn with a small bolero jacket. From a bandeau of seed pearls at her head her floor-length veil of silky net fell softly. Her flowers were a bouquet of pink roses.

Miss Mary McEachern, of Killam, was bridesmaid, and was dressed for the occasion in a pretty gown of blue embroidered net over tulle. The pink bandeau of flowers in her hair matched the ribbons trimming the skirt of her gown. She carried pink and white sweet peas.

Mr. T. Larson, brother of the

The Women's Institute

The monthly meeting of the Irma W. I. will be held on Thursday afternoon, Sept. 1st, at 2:30 p.m., in the Legion hall, Main street. Roll call will be "How to serve a handy lunch to threehairs." Dr. Greenberg will give a talk on "First Aid." Hostesses, Mrs. A. Harper, Mrs. McFarland and Mrs. McMillan.

—Mrs. C. Wilbraham, Sec'y.

bridegroom, was best man. Miss Alice Clark, of Stromo, played the wedding march.

Following the ceremony a reception for 30 guests was held at the home of the bride's parents.

From the centre of each room hung a white wedding bell surrounded by white and silver streamers. Pretty summer flowers were the floral decorations for the table on which was placed the lovely three-tiered wedding cake.

Mr. and Mrs. Larson left later on a honeymoon trip to Edmonton. On their return they will take up residence in Irma.

For Job Printing see E. W. Carter.

KINSELLA KERNELS

Mr. and Mrs. R. F. Witton and Mr. Donald Witton motored to Edmonton on Sunday.

Miss Laura Mark returned on Saturday from Edmonton where she had spent the past week visiting Mrs. Shippy and friends.

The W. I. will hold their meeting in the Club Room Saturday, Aug. 27. Mr. and Mrs. W. W. Kerns of Oregon, formerly of Kinsella, are visiting friends in the district.

Mr. and Mrs. Bile, and Mr. and Mrs. Berzanski motored to Edmonton and Mundare on Sunday.

Mr. and Mrs. H. Koon, Bobby and David left for their home in Detroit, early on Monday.

FAREWELL GATHERING

The home of Mrs. Arnold was full to overflowing on Saturday night, when some 45 relatives and friends of Miss Mary Elliott gathered to bid her farewell.

Coming to Irma from Ontario, in 1910 Miss Elliott has been a resident of this district ever since, with the exception of four years spent in Vancouver.

"Mary" as she was known by old and young alike, endeared herself to all who knew her, and it was with deep regret they met to bid her even a temporary farewell. Truly a friend in need, no task was too great or too unpleasant for Mary to undertake, wherever necessity arose. Down through the years that touch was so widely felt that to know her was to be her friend.

Miss Elliott was greatly surprised when some of these friends began to arrive, and even more so when later in the evening Mr. Colin McLean was called upon to make her a presentation, as a token of the love and esteem she enjoys in the community. In a few well chosen words Mr. McLean tried to express the feeling which prompted the gift and Mary very feelingly responded.

A tasty lunch brought a really jolly evening to a close, and each departing guest bid Mary "bon voyage". Miss Elliott left on Monday morning to visit with friends and relatives at the coast.

NOTICE

In the Estate of John Hub Elliott, late of Irma, Retired Farmer, Deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named John Hub Elliott, who died on the 8th day of January 1938 A.D., are required to file with Purvis & Logan, Barristers, Viking, by the 23rd day of September, 1938, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to his knowledge.

DATED this 11th day of August, 1938.

PURVIS & LOGAN,
Barristers, Viking, Alberta,
Solicitors for the Executor.

Minutes of Meeting of M. D. of Buffalo Coulee

Aug. 13, 1938. — Council meeting was held in Galtzau School with Crs. Hetherington, Phassey, Ramsay, Hills, Dew, and Curry present. Reeve Phassey presiding.

Minutes of July 9th. were read and adopted.

The Secretary read the monthly statement for July when it was signed by the Reeve.

Dr. Greenberg of Irma was present and asked payment of old indigent accounts totaling \$355.00. After prolonged discussion Cr. Ramsay carried that \$100.00 be paid as full settlement of all accounts to date.

Further relief circulars read. It was decided on motion of Cr. Dew to ask for continued assistance from the senior governments in case further relief was required. Correspondence read re Ekil Johanson. W. E. Judson applied for further relief which was refused on the ground that there was plenty of work available.

Discussion re the S.E. 18-48-9-4. and collection of the rent Cr. Curry carried that case be referred to J. I. Jones for action.

Letters were read re R. Fielding, with a ruling from the Health Department that he is not entitled to free hospitalization in Manville Hospital as he is not a ratepayer. The Secretary was instructed on motion of Cr. Hills to issue a cheque for \$10. to Chas. Reel for maintenance of Earnest Fielding each month from the 1st of July.

Cr. Ramsay gave his report re Creditors meeting in Wainwright re R. L. Rohrer. Cr. Hills carried that report be accepted and expenses paid. Further discussion re seizures and collections. Cr. Hetherington carried that Neil Stewart be appointed Bailiff, remuneration to be at a flat rate of \$1.00 per seizure.

A letter was read from Dr. Knapp advising of a chest clinic to be held at Manville Hospital at 9:30 a.m. Aug. 19th, 1938.

A draft by-law under Section 507 (b) of the M. D. Act was presented by the Secretary. After prolonged discussion it was decided not to pass this by-law for this year and Cr. Dew carried that \$9.75 of the Municipality Tax levied on the 2 acre fractional part of the N.E. 4-48-7-4 be cancelled.

Further correspondence read regarding diversion on the N.W. 4-48-7-4. Cr. Curry carried that as road has been built on road allowance survey be cancelled.

A letter was read from the Vegreville School Div. No. 19 regarding health services for school children.

Decision left over to next meeting.

Letters were read and report made regarding Ben Brady.

Secretary to write Review Board regarding Wm. Wright.

Crop and stock production estimates were completed.

Further letters read and further discussion re Mrs. Nichyporuk.

The Secretary was instructed to write again regarding Mrs. Ambler's M. Allowance.

Correspondence read and report made regarding vaccine for horses. Cr. Hills carried that action in this regard be approved.

The Municipal Inspector's report was read and after full discussion it was ordered filed for future reference on motion of Cr. Hills.

Cr. Dew carried that timesheets be passed and paid.

Cr. Curry carried that bills and accounts be paid.

Cr. Dew carried the adjournment.

Roy W. Hay, Secretary-Treasurer

PLAN TO VACCINATE ALL ALBERTA HORSES AGAINST DISEASE

Edmonton, Aug. 26.—Plans to vaccinate every horse in Alberta next spring against encephalomyelitis are being made, it was announced here by the provincial department of agriculture.

An outbreak of the disease which attacks the horse's brain was reported from Peace River area, the first from the north-western part of the province. Vaccine has been shipped to the area.

NOTICE

Please take notice that no children will be admitted to the Irma public school unless they are of the full age of six years on or before September 30th, 1938.

—E. W. Carter, Sec'y-Treas.

The "Wares" In The Orient

The very recent "open" appearance of Russia as a foe to Japan in the oriental war theatre on the borders of Manchukuo, Japanese puppet state, will set afoot a great deal of speculation as to where the latest developments in the far east will eventually lead, and whether or not other European powers will later become involved.

If so, it is quite conceivable that the time will come, sooner or later, when Europe will again become the battleground between the major nations of the world, for it is quite on the cards that Russian intervention in the war between China and Japan constitutes but another step towards the mastery of another world wide imbroglio.

It is true that no state of war has yet been declared between Russia and Japan but border-line clashes are becoming more frequent and incidents more intense and, in fact, under the rules of modern warfare—or lack of them—it is quite possible for Russia and Japan to engage in a large scale conflict without any formal declaration of hostilities on either side.

Russia Has Memories

Russia, it might well be pointed out, has more than one reason for taking advantage of a weakened Japan if the Soviet, with one of the strongest armies in the world at her command, believes that her former opponent of 1905 is in a state of vulnerability. Russia has the memory of her defeat at the hands of the Japanese in 1905 as an incentive, and as a further goad the more recent announcement (1935) of the pact between Germany, Italy and Japan, admittedly aimed against Communism and which Russia undoubtedly interpreted as a direct threat against herself.

No matter how strict may be the censorship of the war news from the scene of the Sino-Japanese conflict and no matter how conflicting and confusing may be the reports of the progress of the strife issued by both of the combatant armies, there can be little doubt that the Japs are now playing a losing game and that the Chinese have everything in their favor in the type of warfare in which they are now indulging—a war of attrition.

As the Japanese lines of communication lengthen out, the guerilla tactics being adopted by the Chinese are likely to become more and more effective in time progress. The Chinese themselves are fully alive to this and that, coupled with their fatalistic outlook, has much improved their morale since the war started. The attack on their country and the ruthless manner in which it is being prosecuted has performed wonders in unifying divided forces and this fact, fortified by the proverbial patience of the Chinese, gives them an advantage which becomes more apparent as the conflict becomes more protracted.

Japan's Economic Tension

Moreover, there are indications that the Japanese are approaching the day when their financial and credit sources will be stretched to the breaking point and the time appears to be not far distant when it will be impossible for them to continue a war of aggression in a foreign country because of inability to pay for needed materials and the impossibility of maintaining armies which are gradually stretching out further and further from supply bases.

Recent news items supply chapter and verse for the assumption that the financial straits of the Japanese are becoming very acute. A country that finds it necessary to resort to rat skins for leather and to instruct its manufacturers to reduce the length of matches by .029 of an inch to yield sufficient revenue to keep the army in the field for one hour and five minutes by the savings of a whole year, must be in desperate economic plight.

If to these impediments are to be added attacks by Russia on another flank on more frequent and more intensive scale, it would appear that the ultimate outlook for Japanese arms on the Asiatic mainland is gloomy indeed.

Merely An Hypothesis

Whether or not Italy or Germany may need it expedient or advantageous, or both, to come to the aid of a distressed Japan in the event of Russian aggression becoming more pronounced, is a question difficult to answer, but it would not be difficult for either one of these dictatorships, or both of them, to find a pretext for doing so, basing their action on the Italo-Germanic-Japanese agreement of 1935.

Numerically, at least, Russia is one of the largest, if not the largest, armies in the world to-day and in some respects, one of the best equipped. Possibly that fact, coupled with a show of real strength on Russia's western borders, might be a deterrent for any ambitious which Hitler or Mussolini might have in that quarter.

It is a reasonable assumption, however, if some of the European nations outside of Russia should become embroiled in the struggle in the Orient it would not be long before hostilities would be transferred to European soil and in such an event it is highly problematical how long it would be before other European powers would be drawn into the vortex.

A Superfluous Subject

A school teacher who asked a girl to buy a grammar received the following note from the child's mother: "I do not desire that my Matty engage in grammar and I prefer her to engage in more useful studies and can learn her to write and speak proper myself. I went through two grammars and can't say as they did me no good. I prefer Matty to engage in geography and drawing and good vocal music on the piano."

All the average man wants to-day is a fairly easy job, a new automobile, a beautiful wife—and a set of creditors who will listen to reason.

Chose Bad Time

As residents mopped brows under a hot July sun, radiators in many homes and offices in Scranton, Pennsylvania, suddenly began sizzling with steam heat. Witting citizens by the score seized telephones to demand an explanation. "Just testing," explained the superintendent of the central heating plant.

Creamery Butter Production

Central Saskatchewan was the heaviest producer of creamery butter during the first quarter of the year, with 713,503 pounds to its credit, according to a report of the dairy branch, Saskatchewan department of agriculture. The southern division produced 680,366 pounds and the northern, 639,472.

Civilization might be defined as an upward growth or tendency that has enabled mankind to develop the college yell from what was once only a feeble warwhoop.

White Men Are Safe

Cannibals In Dutch New Guinea Prefer To Eat Their Relatives
A white man's life among Dutch New Guinea cannibals is quite monotonous because the cannibals prefer to eat their relatives, S. Dillton Ripley, 24, of the Academy of Natural Sciences, said.

Ripley returned from a stay among the cannibals, said nothing—rates higher gastronomically than a relative who oversteps the bounds of propriety.

"The system," he said, "results in a minimum of brawls and love thieves in the tribe."

It resulted in part from the Dutch government's attitude toward the consumption of white man and Chinese, he said.

"For instance," he continued, "let's suppose a tribesman steals from a fellow-tribesman his wife or some other personal possession. The victim lodges a complaint with the chief and the chief calls a council of assistant chiefs and priests. If they decide the meat shortage is acute enough to warrant drastic punishment, the offender is invited to a big blow-out."

"He doesn't know he is about to be barbecued. He dances with the rest of them and the only indication of the unusual honor to be bestowed on him is a garland of flowers about his neck."

"When the dancing ends, the unfortunate is killed with spears selected poles and divided. The guests then roast him to individual taste."

Clever Narcotics Gang

Prayer Books Hollowed Out To Hold Smuggled Drugs

Holy books alleged to have been used in the drug traffic led to the arrest in Paris of a self-designated "grand rabbi" from Brooklyn and pointed the way to what police hope will prove the round-up of a clever New York narcotics gang.

Held in Sainte prison is Isaac Leifer, who, authorities confirmed in New York, once presided over a synagogue in Brooklyn, and Hermann Goldtiner, an alleged accomplice.

Heroin worth \$20,000 was seized. For months, according to agents of the Surete Generale, Leifer had been mailing volumes of the Talmud and Hebrew prayer books, their bindings hollowed out to hold dope, to the United States.

Forty such books were found in a package used by Leifer at the time of his arrest. Acting on information from New York, French police have been watching Leifer for some time, and the books he posted were all traced to their addresses in America.

He told the book-binders who made the special bindings that he intended to hold holy sand from Jerusalem. He and Goldtiner, a Hungarian, were nabbed just after registering another set of books at the post office.

Old Fort Henry

Interesting Ceremony Dedicating Bastille To Cause Of Peace

Old Fort Henry, which for 100 years has guarded Kingston's harbor, has been rebuilt and recently was dedicated by Prime Minister Mackenzie King to the cause of peace.

Built in 1832-6, it was planned to defend this country against attacks from United States. Now it has become an instrument, not of war, but to increase the friendship of the two nations.

For over a generation this once mighty fortress had been neglected and fell into ruin. Through the co-operation of the Dominion and the Ontario government, its walls have been renewed and the old guns installed on their original foundations.

In the historic parade, with a multitude of people occupying the entire grounds and every vantage point of the fort, Canada's prime minister traced the growth of Canada, torn first by wars with foreign countries, then torn by political and racial differences within itself, and how these had all been reconciled.

He paid tribute to the men who have been able to "reconcile their differences and make a great Canadian people united from one end of Canada to the other."

The largest process in the California orange industry is to use the X-ray at the rate of 22,500 oranges an hour and have a complete diagnosis of each one before it is shipped.

London reports Sir John Reith has left the B.B.C. to become chairman of the board of Imperial Airways. Merely a change of air.

Nine per cent. of India's cultivated area is used for wheat growing, while 31 per cent. is used for rice cultivation.

You can't tell from where you sit what kind of a picture you'll take.

A Means Of Defence

Britain Plans Gigantic Smoke Screen To Hide Thames Estuary

Great Britain's Air Raid Precautions Department is going to try blotting out the mouth of the Thames River, essential landmark on the air route to London from the continent, by a gigantic smoke-screen as a means of defence against air raids expected to feature the next war, says Science Service.

Successful use of smoke-screens at sea to blot out whole fleets and the large amount of smoke sky-busting planes are able to generate indicate the feasibility of the plan, the United Service Review, England's leading defence technical journal believes.

"If the Thames estuary could be effectually blotted out it would amount to the removal of the main sign-post on the way to London for invaders, and there seems no reason why the smoke-screen should be for use at sea only," the journal declares. London is situated a short distance up the Thames river.

"Within measure the smoke would be controllable and could be so diffused as to provide no risk for our own patrolling aircraft when they come in to land."

Need Better Wheat

Says Canadian Wheat Has Deteriorated In Quality

While wheat producers of other countries have steadily improved the quality of their strains, Canadian wheat has deteriorated in quality to what it was years ago, A. T. Sinclair of Winnipeg, assistant director of Canada's crop testing plant, warned Alberta farmers.

Seven years' study under the plan has shown that 38 per cent. of the wheat grown in western Canada was from mixed strains. Four or five per cent. of the farmers didn't know what variety of wheat they were growing, he said.

"The varieties in a mixture ripen at different times and raise the problem of when to harvest for best results," he said. "With a mixture the farmer gets a lower yield and grade and less money for his crop."

The testing plan, he said, was sponsored by eight western grain companies, assisted by the federal and provincial departments of agriculture, the three prairie universities and schools of agriculture.

SELECTED RECIPES

CHOCOLATE MARBLE CAKE

2 cups sifted Swans Down Cake Flour

2 teaspoons Calumet Baking Powder

1/2 teaspoon salt

1/2 cup sugar

1/2 cup milk

1/2 cup vanilla

3 egg whites, stiffly beaten

1 square Baker's Unsweetened Chocolate

1 tablespoon sugar

2 tablespoons hot water

1/2 teaspoon soda

Sift flour once, measure, add baking powder and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add flour alternately with milk, in small amounts, beating until smooth. Add vanilla. Fold in egg whites quickly and thoroughly. To melted chocolate, add sugar and water, stirring until blended. Then add soda and stir until thickened; add to 1/2 of cake batter. Put by tablespoons into greased 8x4x3-inch pan, alternating mixtures. Bake in moderate oven (350 degrees F.) 70 minutes. Frost as desired.

CUSTARD SAUCE

1 cup milk

2 egg yolks

2 tablespoons white sugar

1 teaspoon St. Lawrence or Durham Corn Starch

1/2 teaspoon flavouring

1/2 teaspoon salt

Scald milk in double boiler. Gradually add beaten yolks and sugar mixed with corn starch, stirring constantly. Cool, add salt and flavour.

How To Get Service

Power Of Suggestion Effectively Secured

Philbert Hartshorn, Owosso, Mich., knows how to get prompt action from insurance companies. He wired insurance company, telling of a storm breaking a window, and asked permission to replace it. No answer came for hours. Hartshorn wired again: "O.K., but remember you also carry our burglar insurance." An hour later a rush telegram authorized a new pane.

Fish sold alive in markets or ordered in restaurants must be stunned with a mallet blow before being touched with a knife, according to a law in Prussia.

The biggest hog on official record is a Poland-China boar that weighed 1,402 pounds when exhibited in 1928.

England expends \$450,000,000 annually on education.

It's a first class tire in every respect—made of high quality materials to Firestone standards of quality and fully guaranteed. It gives you everything you need—safety, long mileage, dependable, carefree service—all at thirty prices. Drive in to the Firestone Dealer's today and see this remarkable tire—the greatest Firestone ever built at these low prices.

Firestone
MOST MILES PER DOLLAR

AFTER FREE PUBLICITY

Considerable amusement was caused at a recent gathering of weekly newspaper men when A. D. McKittrick, editor of the Orangeville Banner, presented a tabulated report on requests for free publicity received in a period of ten days. The combined space ran to over 500 inches, which, if printed at regular rates would amount to \$150 or more, and would take up 25 columns or four extra pages. The same story could have been told by every weekly newspaper in Ontario.

Space in a newspaper means exactly to the publisher what a can of salmon or peaches or any other commodity does to a grocer. If he cannot sell them he is out of luck, and if there is no market for newspaper space the publisher is similarly out of luck. Yet all sorts of people and organizations who would not dream of walking into a store and helping themselves have no hesitation in panhandling when it comes to newspaper space. —Paris Star.

Exchange Of Courtesies

A stout man and a thin man were having an argument and began to get personal. "From the look of you anyone would think there had been a famine," cried the fat one. "Yes, and one glance at you would convince anyone that you had caused it," retorted the thin man.

Money In Wild Hay

Wild hay cut and sold in Manitoba last year had a value of \$4,077,700. This represents the sale of 883,000 tons. A provincial crop bulletin shows a steady rise in value of wild hay sold, from \$2,817,450 in 1933 to the four million odd last year.

One-eleventh of the total area of the state of Maine is made up of lakes and ponds.

No Dull Moments

Sir Charles Tegart Has Had Many Thrills During His Career

A thrilling book could be written on the career of Sir Charles Tegart, who has returned to London after a six months' visit to Palestine, during which he has advised the Government on the suppression of terrorism. When he was Chief of the Calcutta Police, he seemed to bear a charmed life. In 1923 a revolutionary killed another Englishman in mistake for him; in 1928 he led his forces against a mob of armed students, and escaped unhurt. In 1930 bombs were thrown at his car, and again he escaped unscathed.

One of his most successful devices was to arm the fire brigade as a counter-measure against motorcar banditry. The public were warned to use the fire alarm immediately a robbery took place, and within a few weeks the bandits had given up the game.

Although he is in the late fifties, and has spent 30 years in India, Sir Charles seems to be still in the pink of condition. —News of the World.

Memorial Destroyed

A monument erected on the Linz-Salzburg road in memory of the first wife of Chancellor Kurt von Schuschnigg of Austria has been dynamited. The monument stood near the scene of the automobile crash in which she was killed in 1935.

The Seri Indians live on Tilburon Island, only two miles out in the Pacific from the mainland of Mexico, yet are little more advanced than ancient cave-men.

Common salt, or sodium chloride, is obtained by freezing or evaporating the water of saline lakes, springs, or wells, or of the ocean, or by mining in beds of rock salt.

It takes eight sheep to string a tennis racket, declares a London expert.

CHAPTER II.—Continued

Barstow looked out the rain-splashed window.

"Oh, yes, I remember. The newspaper mentioned that—of course it was romanticized. The poor boy went away, worked his way through college, looked for gold, found it, came back to Seattle, and accidentally met the girl he had loved for years."

"Only it wasn't accidental," supplied Hammond. "A friend took me out there—Timmy Moon, he's an aviator. Not working at it just now, I understand; something wrong with his plane. But no matter; we'd met up and of course—you know, home for the first time after all those years—I asked him whatever became of Kay Joyce. There was a moment's pause. Hammond rubbed at his hot face. Then he looked up, a queer burning light in his dark eyes.

"You know, Barstow, it was the funniest feeling to ride up to that old house in an automobile and get out and walk right through the gate."

"Where you had played as children."

"Played nothing; that old granite block of a father never would let me inside the yard. You couldn't blame the kid for snouting me—with him telling her not to associate with ragtags."

"I suppose not," said the attorney, staring at his law books.

"It was funny in a way. Timmy had called up the house, but he hadn't said whom he was bringing out. Kay didn't recognize me for a minute; I'd have known her anywhere."

"Naturally."

"Well, for awhile I wished I hadn't come. You see, I'd always dreamed of that house, as the grandest place in the world—one of those old-time building-block places, with turrets and a slate roof."

"I know the kind."

"And Kay was a bit distant at first; you know, hard to pick up the thread after all these years. Then, just for fun, Timmy pretended to have forgotten his handkerchief. So he reached for mine. I had a moose-hide bag full of nuggets in that pocket."

"You'd fixed it up that way."

"I suppose not," said the attorney.

"Of course. So, out came the nuggets with the handkerchief and spilled all over the floor. You should have seen us! Again he rubbed feverishly at his face. "Everybody down on the floor, helping pick up those nuggets."

Barstow eyed him, a gentle appraisal.

"That helped considerably, didn't it, Jack?"

"Oh, yes. Naturally, it led to ques-

tions and something I could talk about. Kay and I got along simply great after I'd found my tongue. Queer, isn't it, how a person will have an idea all his life, that if he could just be free to talk to a certain person, all her false ideas of him would fade away? You know. Everything divided us when we were kids; social position, money, and all that. We didn't even go to the same school. But I never wanted anybody but her—I've never wanted anybody but her. And I knew that if I could just get together with her, without that old chisel-face of a father around—"

"I judge from the newspaper accounts that you got along famously," Hammond stated.

"Where in the world did they get all that stuff?" he asked, then was silent. His brain had spun for a moment, suddenly to halt, highlighted upon one particular recollection. It was the Crystal Castle in Seattle, with persons crowding around Jack's table. He could see Kay's outstretched hands as her fingers toyed with scattered, pebble-like nuggets, where he again had tossed them from the heavy moose-hide pouch to the tablecloth. Persons were asking questions, all sorts of questions; now Hammond remembered a young man with a newspaper stuffed in one pocket, who queried him with particularity.

"We did the town," he said. "I guess some newspaper man must have barged into our party."

"Evidently. He got the story about as you've told it. Even to the farewell down at the dock."

The telephone rang. Barstow turned to answer it. Jack did not notice. He was back in Seattle, with the big red sun coloring the waters of the Sound, with the whistle of the S.S. Albatross sounding its warning for all passengers ashore. And he stood at the foot of the gangplank, with Kay close to him, telling him that she wasn't afraid of life in a new, raw mining camp. Then there was Timmy Moon, rubbing at his pudgy face and rattling on about how they'd all be up as soon as good weather came and he could get his airplane fixed. And Kay, the mother, thin, angular, amusingly acidulous, poking a dead cigarette out of its long, green holder only that she might insert and light a fresh one.

The receiver clicked on the hook. Barstow turned back to his client.

"So they're all alone now, just the girl and her mother."

"Yes, except for an old friend of the family. Oh, I shouldn't say he was old in years—a little more than my age. A geologist; the old man was interested in a lot of mining down in South American countries. This Bruce Kenning used to look after a lot of stuff down there for him."

"Not a rival?" asked Barstow, with a thin smile. Hammond laughed.

"My best friend. He reminded Kay that he had talked more about that boy who used to live down my alley than any other person she'd ever known," Hammond chuckled. "If it hadn't been for his help, I might not have had the courage to say a lot of the things I did."

"An old friend and plenty of liquor certainly do help."

The attorney shuffled a few loose papers.

"A man can't ask any more than that."

"Not if he's been in the bush so long that he's grown moose. God, I was fed up with the North! But I'm itching to get back now. There's why too wanted me to see you. To check up on all our claims. Stakers will be running around how wild in the snow up there in another month."

The attorney smiled about his fling case and brought forth a fat envelope, scattering the contents on the desk.

"Let's see—" he mused. "Three regular creek placer claims apiece on Loon creek, 200 by 100 feet off Moose river. Correct?"

"That's right. How about the half-mile government lease at the headwaters of the Loon?"

"Everything's paid up and granted."

"And those other five leases?"

Barstow counted the papers.

"Five. That's right. What'd you two take up those for?" he asked.

"That's 400 acres of land that isn't even near water."

"Have you got the government receipt for the lease?" insisted Hammond.

Barstow tossed it over. The prospector looked at it and handed it back.

"If Joe and I make anything out of this find—that's probably where we'll do it."

"I thought the stuff was all in the Loon creek sands."

"That's an old country," answered Hammond. "Loon creek has wandered all over the map. We've got a young bed-rock—not over a couple of hundred years old. If we get into big money, we've got to find the old bed of the Big Moose—the real one where nuggets were piled up for a thousand years or more."

Barstow nodded.

"Well, you've got the country checkerboarded; no reason why you shouldn't have luck. Going out in the morning?"

Hammond laughed.

"Who isn't?"

"Business was over. They talked for awhile, of the developing rush into the new gold regions, the weird hopes and dreams which every fortune-seeker would carry into the North, few of which would be realized. At last Hammond rose to leave."

(To Be Continued)

Beat The Depression

Unemployed Man Builds Up Business

On a Small Capital

Five years ago unemployed Hans Broe invested his last \$60 in a boat garage on the banks of the Red River in the heart of Winnipeg. Today he employs six men and his investment has grown to 600 feet of docks, almost 100 boats and two machine shops.

Born 40 years ago on a remote Danish island in the North Sea, Broe first came to Winnipeg in 1919. In 1933, jobless and almost penniless, he conceived the idea of a boat livery to beach resorts. "The river water is as clean as lake water, perhaps cleaner," he thought. Since then his business has grown steadily. On his own property he has filled in river bank slides which required 3,000 yards of earth.

"It hasn't been easy, but it has been good," said Broe. "I sleep on the job, and don't get as much out of it as the men do." He visions the day when slow-moving houseboats and pleasure-craft will sail the river and its banks will be banded with driveways and dotted with swimming pools, bathhouses and havens of recreation for tired city folk.

Fishing In The Upper Air

Scientists Look Above The Earth For Rust Spores

United States agriculture department scientists are going fishing in the upper air for rare, living spores which they hope will throw new light on control of destructive plant diseases, including black stem rust of grain. They are going far above the earth with a "sky hook," resembling an instrument once used by Col. N. Charles Lindbergh for studying the upper air. In this, they will attempt to collect specimens of minute plant parasites that float in air currents at great heights.

Seeds Were Still Alive

Taken From Egyptian Tomb Yield Green Peas In Blue Pots

Green peas in dark blue pots were exhibited in England at a Harrow Weald (Middlesex) horticultural show.

They had been grown from seed which had been lying dormant for 4,000 years in Tutankhamen's tomb, discovered a few years ago.

A. Aldridge explained that one of the excavators handed some of the seed to a gardener. To the gardener's amazement, the seed grew. A few of the pods were given to Mr. Aldridge's son, who began growing the peas on a large scale.

Water is essential to the existence of every known form of life.

Dr. Williams' Pink Pills for Pale People

Dentists recommend Dr. Williams' Pink Pills as an aid to strong, healthy teeth. Cleanses them of food particles; massages the gums. Aids digestion, relieves stuffy feeling after meals. *Helps keep your healthy! Take some home for the children too—they will love it!*

Dr. Williams' Pink Pills for Pale People

Cancer Treatment

Radium Threads Said To Be A New Method

Invention of radium threads, a new method of treatment for cancer, was announced at the New York City Cancer Institute.

The threads are made by taking ordinary "sutures" used by surgeons for sewing up wounds, and inserting in them, spaced like beads, tiny gold or silver "seeds". The seeds, long used in cancer treatment, contain radon, the gas from radium, which gives off exactly the same rays as radium.

The seeds are so small the surgical radium thread is smooth enough to be sewn into, or around a cancer. The advantage for the "thread radium," according to its originator, Dr. Fred Hanes and associates, is the certainty of placing the burning substance in precisely the best locations.

The seeds are spaced, as a rule, from a half to one centimetre apart. Another use of the radium thread is for cancer of the stomach. The threads are placed in rubber bags, lining it so as to cover a surface about equal to the cancerous area of the stomach. The bag is inflated, swallowed, inflated, and the patient has the radium threads more or less blanketing his "lesion."

The radium threads are sterile, like ordinary surgical sutures, and hence safe for use in any part of the body. The announcement stated that the new method has proven exceptionally valuable in treatment of mouth cancer. The patient can continue to eat and drink without much inconvenience and does not have to stay in, or near, a hospital bed.

Canadian Buffalo In Poland

Presented By Canadian Government Are Thriving In New Home

Three young buffalo cows and a bull given to Poland by the Canadian Government in 1934 are thriving in their new home in the Park of the State Upper Forestry at Smardzewice, according to word received at Ottawa by Jan Pawlica, Consul General of Poland. The little family has grown in numbers and now totals eight.

Experimental culture of Canadian grass, the seeds of which were sent to Poland in 1930 by the Consulate of Poland in Winnipeg, has also proved successful and this grass is actually used for feeding the imported buffalo.

The Canadian buffalo in Poland are to be kept in pure breed and only after their number has considerably increased will some cows be used to mix with the Polish buffalo called "zubr".

Fighting For Peace

British Prime Minister Is Keeping To Only Safe Course

If any of the criminally insane want war, Chamberlain is not their man. He is fighting his battle for peace with the dogged and unshakable determination of British battalions all down through history, fighting for victory. He leaves as little as possible to chance. Wherever he sees a whiff of smoke curling upward that may indicate fire, he promptly pours water over the dangerous spot. He has done this in the Spanish civil war again and again. Now he does it in Czechoslovakia—Montreal Star.

Changed His Attitude

The lad entered the business establishment and took off his cap. "I observe, sir," he said quietly to the manager with a bow, "in passing by, that you require a respectable, well-spoken boy, and I am particularly fitted and qualified for the vacant situation, sir."

"Oh!" said the manager, "that berth was filled yesterday."

"Then, you silly old jester," shouted the respectable lad, heatedly, "why the blazes don't you take the blinkin' card out of the blomin' window?"

The first known wrist watch was made in Switzerland in 1806.

Fishery Production

Manitoba Leads Western Provinces In Value Of Output

Production of Ontario fisheries in 1937 had a market value of \$3,613,596 and a value at the point of landing of \$3,140,584 compared with values of \$3,509,422 and \$2,713,722 respectively for 1936, according to the annual report, issued by the bureau of statistics.

Saskatchewan and Alberta and the Yukon Territory had a combined market value in 1937 of \$2,765,032 compared with \$2,357,993 in the preceding year.

Manitoba is the leading province with respect to value of fisheries production, with a total of \$1,796,012. Saskatchewan is second with \$827,109. Alberta third, with \$433,334, and the Yukon Territory last with \$5,467.

Each of the three provinces shows an increase in value as compared with 1936 while for the Yukon Territory a decrease is recorded.

Taking the provinces individually, whitefish is first in Saskatchewan and Alberta while Manitoba displayed pickerel.

Safe Driving

U.S. Motorists Stepping On The Brakes Instead Of On The Gas

Motorists in the United States are beginning to step on the brakes in time to save lives.

The United States National Safety Council reported that traffic fatalities for the first six months of 1938 were fewer by 22 per cent. than during the same period last year.

By heeding the plea to drive more carefully, motorists saved 3,870 lives during the first half of 1938, the council said.

The steady decline in fatalities was registered despite a two per cent. increase in highway traffic during the first five months. If the percentage of decline continues for the balance of 1938, the council said, the year's traffic toll would be the lowest since 1928 and would represent a saving of 8,700 lives in comparison with 1937.

June was the eighth consecutive month to register a decline. The death toll for the month was 2,270, or 24 per cent. under that of June, 1937.

Mercury Deposits

Located In B.C., May Be Used By Canada For Defence Purposes

Extensive new mercury deposits are reported to have been uncovered at Moha, near Lillooet, B.C.

The property is owned locally by a group of eight men, and specimens analysed by the provincial assayer at Victoria are said to have run from \$40 to \$180 a ton.

A report has been sent to the Department of Defence, Ottawa, owners stating they wish any extensive production to be controlled by the Dominion for defence purposes.

A box of the ore has been sent to the Dominion Mines Department.

The strike is 15 miles north of an operation on Mud Creek in the Bridge river valley, which has been under development for more than a year by Montreal and Vancouver interests.

The new body, believed to be in the same zone, has lower grade values but has tonnage possibilities.

Honor In Arms

Duke Of Wellington Kept His Word To French Marshal

The following story is taken from a letter to the London Times:

According to Sir William Fraser's "Words on Wellington," the Great Duke must have been one of the last exponents of "honor in arms." Before the battle of Orthez the bridge over the Gave de Pau had been passed by the French army. The Duke sent a note to Marshal Soult saying that a battle would, of course, take place on the following day; but that, as it was desirable in the interest of the inhabitants of Orthez not to destroy the bridge, he promised that, if Marshal Soult would abstain from blowing it up no soldier of the British army should cross it. Soult trusted him, and the bridge is to this day intact.

The Kitchener Record claims that half the trouble in the world can be attributed to curiosity. That may be so, but more than half the progress in the world is attributable to that very same quality.

Man—Do you know, honey, if I had to do it all over again, who I'd marry?

Wife—No, who?

Man—You.

Wife—Oh, no, you wouldn't.

A British writer says that a man swimming at about four miles per hour uses more energy in proportion than a shark travelling at 20 miles per hour.

I found sweetening my morning cereal with BEE HIVE Syrup aids digestion.

TRY IT TOMORROW

Goderich Took Its Loss

Fair On Railway Debt In Full For Which It Received No Benefit

The town of Goderich is to be congratulated for getting rid of its own railway debt. It has shown fortitude and persistence in meeting an obligation which, events showed, was ill advised. Thirty years ago, bonds were issued for \$150,000 to subsidize the Ontario West Shore Railway. The road was never completed, but Goderich lived up to its end of the contract and has just paid off the last of the debt. Interest amounted to \$225,000, so the town is out of pocket \$375,000 for something of no value to it, unless the experience is counted an asset.

Goderich, be it noted, did not shirk its responsibility through clever games or bad. It has paid up, wiped out the debt with clean hands, a clear conscience, and unswerving credit. Probably the good people of the community never thought of leaving the creditors, although they were beaten by the promoters of the railway. In any event, they have retained a sound reputation and set an example in honesty for other municipalities—Toronto Globe and Mail.

Plans Adventure

Will Sail From England In Forty-Foot Boat On Trip To Canada

Two years of adventure lay ahead of Rev. John Antle, retired administrator of the Church of England's Columbia Coast Mission when he left Victoria for England with plans to return in a 40-foot sloop.

Mr. Antle, honorary sea chaplain of the Royal Victoria Yacht Club, said he expected to get out from England in the little yacht *Reverie*, before the end of August. First stop on his leisurely return to Victoria was to be Newfoundland.

After spending several months in that colony, he planned an extended cruise around the West Indies before passing through the Panama Canal and returning to Victoria two years from now.

Once before the elderly clergyman voyaged from England to Victoria in a small boat. That was in 1933 when he brought the motorship *John Antle* to Victoria for use in his mission work.

An Unusual Plea

Maid Admitted Partial Guilt For Stealing From Employer

"Partly guilty" was the unusual plea entered by May Anna Alexander, a New York Negro housemaid accused by her employer of stealing 60 pieces of silverware, linen and some jewelry.

Defendants said they found 47 pieces of the stolen silverware and some linen in the maid's home.

"I didn't take the rest," the defendant said, explaining her plea.

There are about two and one-half miles of corridors in the famous Hall Courts of London.

LOCALS

Born, to Mr. and Mrs. Calvin Urquhart, at Wainwright hospital, on August 17, a son.

Mrs. Wm. Mason is visiting at the home of her mother, Mrs. T. Berg, in the Viking district.

Mr. Pryce Jones and family are preparing to move into the Elliott house at the end of this month.

Miss Mildred Plante is at Miss M. Day's beauty parlor, Edmonton, taking the full course in beauty treatments. This will take about six months.

Mr. and Mrs. Albert Hughes, who are at present residing at Turner Valley, stopped in Irma on Friday to renew acquaintances en route to Wainwright.

Mr. Thomas Marden's mother who has been visiting here returned to her home at Wetaskiwin last Tuesday. Thomas Jr. accompanied his grandmother for a short visit.

Rev. E. Longmire and family are expected home this week. Mr. Longmire will conduct the church services at Paschenedale, Crescent Hill and Irma at the usual hours on Sunday, August 28th.

The Irma school notice in last week's issue should read "No children admitted unless they are of the full age of six years on or before Sept. 30, 1938," and not as it appeared last week.

Mrs. Mabel Christenson was a visitor in Irma from August 18 to 23. Mrs. Christenson had been on a trip to Boston, Mass., during the holidays and has now returned to Jasper to prepare for school opening.

All the Irma high school students have received their examination results and the majority did very well. Max Webber, Paul Bethege and Henry Kasten received honors, 80% or better, in all the subjects they wrote.

Special: Style Beauty Parlor, Irma, offering school girls' permanents for \$2.50, between August 29 and September 3rd, inclusive. Free finger-wave two weeks later, with every permanent. Please make appointment. Operator: A. L. Barrett. 19-26

The Irma Trading Co. have just installed the latest model Kelvinator electric refrigerator. Mr. Jas. Craig built the cabinet and the Kelvinator agent installed the refrigeration mechanism, which is the first of its kind on this line. This new equipment is a great improvement on the store and will give the best of protection to perishable foods, such as meat, butter, etc.

REGAINS CONSCIOUSNESS

(From the Viking News)
C. A. Harden, of Wainwright, who has been unconscious since July 21st when he was injured in an accident on the highway four miles east of town, regained consciousness Tuesday at the local hospital. He was taken to Edmonton today (Wednesday) by Dr. Haworth, for further medical attention. It is believed that Mr. Harden will recover from the serious injuries he sustained at the time of the accident.

CARD OF THANKS

We wish to extend our heartfelt thanks and appreciation for the acts of kindness, messages of sympathy and beautiful floral offerings received from neighbors and friends during our recent loss of husband and father. We especially thank Dr. Haworth, Miss Metcalf and nursing staff for their kind services.

Mrs. Wm. Bridgeman and family,
Jarrow, Alberta.

* of the Turner Valley oil fields
* would it have
* Need for Protraction been possible
* Shown by Experi- to save to
* ences in Texas prairie con-
* sumers the 5%
* million dollars which will be sav-
* ed this year.

There is a natural tendency to minimize the marketing problems which meet Alberta producers. Marketing problems, it is often said, solve themselves. Experience has shown the error of those who hold this comforting view. They are unaware perhaps, of the confusion which once reigned in the oil fields of East Texas. In the process of developing its market, the price of crude oil in that field went down as low as 10c a barrel. While proration was put into effect, martial law had to be invoked to enforce it. Once the benefits of regulation were realized, the views changed. It has been fortunate for Alberta and the west that the industry here has avoided the disastrous experiences which caused such trouble in Texas.
